

Kyra Riedel

kyrariedel@gmail.com | kyrariedel.github.io | github.com/kyrariedel

EDUCATION

Northeastern University, Boston, MA

Khoury College of Computer Sciences

September 2021 – May 2025

Bachelor of Science in Computer Science and Biology with a minor in Computational Data Analytics

Candidate for Masters in Computer Science

Expected Graduation: August 2026

Graduate Coursework: Machine Learning, Computer Vision, Software Engineering, App Development, Cybersecurity

COMPUTER KNOWLEDGE

Languages: Java | Python | JavaScript | Typescript | R | C++ | HTML | CSS | SQL | Assembly
Systems & IDEs IntelliJ | Visual Studio | RStudio | Emacs | Cypress | Git | Eclipse

WORK EXPERIENCE

Millennium Management, New York, New York

June – August 2025

Equities Technologies Intern

- Designed a mobile dashboard interface with over 30 graphs and highlighted data summaries, allowing all PMs to view metrics on-the-go

New York Genome Center, New York, New York

July – January 2023

Bioinformatics Analyst – Intern

- Implemented robust matrix denoising (PCA) in R to analyze genomic copy number data, optimizing signal-to noise ratio in genetic variation detection
- Tested the algorithm against competitors using R and identified key issues in the pipeline and design process
- Produced data visualizations using ggplot2 to show algorithm performance metrics compared to competing algorithms and presented the findings at NY Genomics and Human Genetics Symposium, January 2024

Northeastern University

January 2022 – July 2024

Teaching Assistant for Algorithms and Data Structures

- Led weekly recitations for 20 students and one-on-one office hours for 100 students

PROJECTS

Image/Video Processor

January - February 2026

- Building a basic photoshop editor in C++ with a GUI that allows a user to apply different special effects to photos and videos, save and edit the modified versions, and detects faces and depths of the media

Patient Portal App

October 2024 – January 2025

- Developed a full-stack healthcare application using React Native and Node.js, implementing RESTful APIs to manage appointment scheduling, secure messaging, and task tracking with image uploading
- Implementing a real-time Firebase database with server-side caching using Node.js to enable secure, HIPAA-compliant communication between users, ensuring data privacy and integrity

Stack Overflow Adaptation

February – May 2024

- Redesigned the web application by implementing components, state management, and routing to create a dynamic user interface
- Wrote component and integration tests to ensure code quality and functionality

Web Crawler and Spam Detection

February – May 2024

- Implemented manual and automated feature extraction techniques to identify spam characteristics
- Trained different algorithms (e.g. Naïve-Bayes) and tested on 30000 crawled documents
